

SPARK THEN IGNITE
ENERGY HEALING

Licensing/Mentorship

Dear Colleagues and Healing Practitioners in the making:

Thank you so much for liking my site and content! - And, of course, for appreciating my healing work!

Please know that I have been cultivating my practice, the healing work itself and website content for many years now which has developed and grown from my creative talents themselves (and support of Guides - of course!). I'm a good writer and have an eye for things. As well, I have had an amazingly talented group of people around me to help me along the way.

The content on these pages have been created from my personal experiences in this field and I would appreciate it if they were not copied. There is a line I have been exploring between flattery and being irked when I feel that something has been taken (without consent). To sidestep this internal debate, I journeyed to understand the root of the issue and was presented with a service to offer:

If you are starting a healing practice and would like some mentorship, I would be happy to offer you some direction.

This would include how to grow your client base, social media suggestions, healing space negotiations, pricing, logistics, rudimentary tax concerns, business expense organization AND website creation - including helping you write your bio, web content and connecting you with my [web designer](#).

I invite you to reach out to me and inquire about how I can help you start and maintain your healing practice. Please email me at: linda@spark-then-ignite.com.

Warmly,

Linda
